## **DETAILED ACTION**

### ***Election/Restrictions***

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-4, drawn to a method for screening for a candidate agent capable of binding to LTRPC2, classified in class 435, subclass 7.2.
- II. Claims 5-13, drawn to a method for screening a candidate agent to detect whether the agent modulates multivalent cationic permeability of the LTRPC2 channel, classified in class 435, subclass 173.1.
- III. Claims 14-21, drawn to a method for measuring multivalent cation permeability of an LTRPC2 channel, classified in class 435, subclass 173.5.
- IV. Claims 22-25, drawn to method for screening for a candidate agent capable of modulating expression of the LTRPC2 channel protein, classified in class 435, subclass 6.

The inventions are distinct, each from the other because of the following reasons:

Inventions I-IV are independent and distinct, each from the other, because the methods are practiced with materially different starting materials, have materially different process steps, and are for materially different purposes. The method of Group I requires measuring of binding of an agent, which is distinct from the method of Group II which requires the screening of an agent and measurement of the effect on multivalent cationic permeability, and these method are distinct from the method of Group IV which requires a measurement of the expression of the protein. The method of Group II is distinct because there is no screening of a compound, only the measurement of multivalent cationic permeability.

Art Unit: 1646

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
